

Kommuneplanens arealdel for Måsøy 2023-2035

This figure is a comprehensive land-use plan for Måsøy, Norway, covering the period from 2023 to 2035. It details the spatial distribution of different types of development across the municipality's diverse geography, which includes numerous islands and deep fjords.

The map is divided into several key planning zones, each represented by a unique color and pattern:

- Bebygge og anlegg (Settlement and Infrastructure):** Includes areas for general settlement (yellow), residential zones (orange/red), commercial and industrial areas (dark blue/purple), and specific infrastructure like roads and utilities (green/brown).
- Næringsmiddelproduksjon (Food Production):** Designates areas suitable for agriculture and food processing (light green).
- Landskapsverdi (Landscape Value):** Identifies areas of high landscape value or scenic interest (light blue/green).
- Utsiktssone (Viewpoint Area):** Marks areas with significant views, often along coastlines or mountain ridges (pinkish-red).
- Revsboen (Reindeer Pasture):** Designates traditional reindeer pastures (brown/orange).

A detailed legend on the left side of the map provides a key for all symbols, patterns, and colors used throughout the plan. It also includes information on the map's scale, projection, and the specific planning objectives it aims to achieve over the next decade.

The title bar at the top of the map contains essential administrative information:

- MÅSØY KOMMUNE KOMMUNEPLANENS AREALDEL 2023-2035**
- Planforslag til offentlig ettersyn**
- Nasjonal arealplan-ID: 5434_20220901**
- Dato: 06.16.2022**
- Saksnr.: 48/21**
- Sign.: [Signature]**

The map itself shows a complex network of land parcels, each assigned to one of the planning zones. Major geographical features like the Lulefjorden, Revsfjord, and various smaller islands are clearly labeled. The overall goal of the plan is to guide sustainable development while preserving the unique cultural and natural heritage of Måsøy.
